

# Beers Labs LLC

AI Evaluation · Agents · Cloudflare

We build AI agent tooling, the evaluations that prove it works, and the Cloudflare systems it runs on. For AI labs, startups and prime contractors.

## WHAT WE DO

- **AI evaluation:** test suites and release gates for model and agent output, with a separate zero-tolerance check per failure class, not one aggregate score
- **Proving the tests:** mutation testing that breaks the code on purpose and confirms each check goes red
- **Agent tooling:** Model Context Protocol (MCP) servers, tool schemas, structured refusals and recovery hints agents can act on
- **LLM integration:** document and data extraction and structured JSON output that survives real model replies
- **Cloudflare engineering:** Workers, D1, Pages, KV and Email Routing, with smoke suites and post-deploy live verification
- **Web modernization:** legacy sites rebuilt fast, mobile-first and cheap to host

## SELECTED WORK

**Scopeweb, scopeweb.io.** Domain intelligence and registration platform with an MCP server so AI agents can search, score and quote domains. Two Cloudflare Workers on one D1 database, guarded by a smoke suite of hundreds of checks across three user identities, plus passkey accounts and card checkout.

**Boarhog LLC, boarhogllc.com.** Design, build, hosting and monthly maintenance since March 2026 on retainer, including an interactive React recognition series.

**Website modernizations.** Legacy WordPress and Squarespace sites rebuilt as fast, mobile-first Cloudflare sites for small businesses.

**EV charging site analysis.** Parcel, zoning, utility and grant data assembled into site decisions for Portland surface lots (2026).

## AT A GLANCE

|                  |                                |
|------------------|--------------------------------|
| <b>Company</b>   | Beers Labs LLC                 |
| <b>Founded</b>   | March 2026, Oregon             |
| <b>Location</b>  | Portland metro, remote-first   |
| <b>Stack</b>     | TypeScript, Python, Swift, SQL |
| <b>Platform</b>  | Cloudflare                     |
| <b>Federal</b>   | SAM active, CAGE 25NS5         |
| <b>Certified</b> | SBA SDVOSB / VOSB              |

## CREDENTIALS

- U.S. Army 68W combat medic, 2022 to 2026, Ranger Tab
- SBA-certified SDVOSB / VOSB, ready to team on federal AI work

## HOW WE WORK

- Owner writes and ships the code
- A test counts only after it fails against broken code
- Done means verified live, not merged
- Fixed scope or hourly, your choice
